Gilair Plus Tubing kits are supplied with 2 pieces of blue tubing for connection to the pneumatic assembly.

The longer tubing (2.25 inches / 57mm) is for use with an older pump that has a straight pneumatic port.

The shorter tubing (2.125 inches / 54mm) is for current pumps that have a 45 degree angle pneumatic port.

The proper tubing length must be used to prevent kinking of the tube and to ensure proper operation of the pump.
